Nicholas Perez

Software Developer

To create software that makes people wonder how they ever lived without it, is my goal.

Bash   C++

PERSONAL PROJECTS

SAS Dual Enrollment Course Picker Web App (01/2015 – 03/2015)

- https://github.com/nperez0111/SAS
- Web app to help students pick courses in order to earn their A.A
- Shows that if I see something as being too difficult I will make something to make it easier

How Wide Is It (06/2016 – Present)

- https://github.com/nperez0111/howWideIsIt
- Web app to help see whether a TV would fit within a designated space
- Shows natural progression of code library to CLI program to Web App

NOAA Weather Forecast (06/2014 – 08/2016)

- https://github.com/nperez0111/NOAA-Weather-Parser
- Web app to make a more readable Oceanographic forecast
- Scrapes NOAA text forecast and uses proper typography and design to make it look readable
